

ORACLE BUSINESS INTELLIGENCE FOR JD EDWARDS RAPID START

AT A GLANCE

Oracle Business Intelligence for JD Edwards Rapid Start solution is for customers looking for a simple, cost-effective data warehouse solution to complement their existing investment in JD Edwards products:

- Predefined data warehouse structure designed specifically for JD Edwards
- Pre-built Oracle Data Integrator maps to pull from JD Edwards sources—World and EnterpriseOne
- Pre-built content—measurements, reports, dashboards

Oracle Business Intelligence for JD Edwards Rapid Start is designed to enable rapid implementation with an existing JD Edwards environment:

- Install Oracle Business Intelligence Enterprise Edition for JD Edwards tools in customer environment
- Connect Oracle Data Integrator tool
- Provide pre-built data warehouse structure and ETL maps
- Provide pre-built Oracle Business Intelligence Enterprise Edition for JD Edwards metadata and sample reports and dashboards
- Provide design workshops to confirm that business reporting requirements are fully met
- Extend the solution to additional JD Edwards application areas or external, non-JD Edwards sources to

Businesses are undergoing a fundamental shift in the way they make decisions. In today's rapidly changing environment, decision-making occurs more frequently and at all levels of an organization. Actionable business insights allow companies to react to changing market conditions and align to key business goals. Oracle Business Intelligence for Oracle's JD Edwards Rapid Start—built by Oracle's JD Edwards team for JD Edwards customers—will jump-start your reporting environment and give you the flexibility and functionality to meet your increasing demands for business information.

Oracle Business Intelligence for JD Edwards Rapid Start Overview

Oracle Business Intelligence for JD Edwards Rapid Start enables rapid implementation with an existing JD Edwards environment. In addition, this Oracle Consulting solution is for customers looking for a simple, cost-effective data warehouse solution to complement their existing investment in JD Edwards' products.

When to Consider this Rapid Start

Your company has been using JD Edwards applications for some time and:

- Is looking for new opportunities to leverage your corporate data to gain a competitive advantage
- Has existing reporting tools that fall short of user demands and requirements
- Has a volume of historical data that has grown to a point in which extracting key measurements has become nearly impossible

Your company is implementing JD Edwards applications for the first time and:

- Is looking for state-of-the-art reporting technology
- Wants to create reports in a flexible dynamic toolset, rather than develop them with the JD Edwards reporting tool and eventually migrate them to a data warehouse

Oracle Rapid Start Benefits

The Oracle Business Intelligence for JD Edwards Rapid Start includes the following:

- Predefined data warehouse—designed specifically to hold JD Edwards data
- Pre-defined extraction, load, and transformation (ELT) maps in Oracle Data Integrator (ODI), a new, state-of-the-art tool in the Oracle Fusion Middleware product family—built to maintain JD Edwards referential integrity and optimized for performance. More efficient than most older technology ETL tools.

build a consolidated “one source for the truth”

- Optimize the solution for maximum performance and flexibility

ORACLE CONSULTING DIFFERENTIATORS

- Oracle Expertise in delivering best practices using standardized methodology, process, tools, and resources
- Breadth of Services for Your Needs to integrate functional, technical, and change management services necessary for optimal user adoption
- Aligned with Your Goals with a cost-effective and comprehensive implementation approach resulting in project success

- Pre-built content—metadata, measurements, sample reports, and dashboards
- Business data marts—including Financials, Job Cost, Sales, Manufacturing, Procurement, Real Estate, and Advanced Cost Accounting
- Transaction-level detail—stored in the data warehouse, allowing drill-down to the lowest level
- Full JD Edwards Category Codes for all applicable dimensions—reflected in the content and allowing flexible filtering, sorting, and summarizing.
