JD EDWARDS ENTERPRISEONE

JD Edwards EnterpriseOne is an integrated applications suite of cross-industry business tools used around the globe by small, medium and large enterprises that manufacture, construct, distribute, service or manage products, physical assets, real estate or operations. Built with a single database, pure-Internet architecture, and a common look and feel screen design to address local and global financial, CRM, human capital, manufacturing, supply chain, procurement, project, sales, service, and asset lifecycle operational business needs with embedded dashboards, analytics, and reporting. The JD Edwards EnterpriseOne suite of over 65 modules is comprehensive and supports process integration across a business.
