

JD Edwards EnterpriseOne One View Reporting

Access to real-time data in an easy to consume format is no longer a luxury for employees; it is a necessity and an essential part of achieving operational excellence. One View Reporting enables users to access and personalize transaction data into lists, charts, graphs and tables thus simplifying the consumption of information. Casual and power users alike will appreciate the simple yet robust, integrated reporting capabilities now available with all JD Edwards EnterpriseOne applications.

KEY FEATURES

- Empowers end users to design, create, run and share reports to meet business needs
- Intuitive and powerful process that does not require complex skills
- Easy access to any level of detail required to make informed business decisions using drill down capabilities
- Real time access to critical operational data
- Single reporting solution for all JD Edwards modules and custom applications
- Embedded administration and management of reports

KEY BENEFITS

- Reduce the backlog of user requested reports with IT
- Enhanced real time decision making through the use of interactive reports with lists, charts, graphs and tables
- Intuitive, user friendly reports designed to improve business productivity
- Visibility into business information directly from JD Edwards applications

In an effort to fulfill the reporting needs of our customers, JD Edwards EnterpriseOne created the following new One View Reporting applications:

- One View Foundation
- One View for Financials
- One View for Sales Order Management
- One View for Inventory Management
- One View for Manufacturing Management
- One View for Procurement and Subcontract Management
- One View for Capital Asset Management
- One View for Service Management
- One View for Real Estate Management
- One View for Project Costing
- One View for Human Resources
- One View for Payroll
- One View for Health and Safety Incident Management
- One View for Warehouse Management
- One View for Rental Management

The new JD Edwards EnterpriseOne reporting capabilities are designed to deliver personalized access to information critical to your business processes. One View Reporting is all about delivering the right data to the right person, right now. Clear and concise views over operational activities lead to more effective decision making and improved productivity. One View Reporting's intuitive interface empowers end users with the flexibility to create personalized transactional reports without the need for IT assistance.

JD Edwards EnterpriseOne One View Reporting

JD Edwards EnterpriseOne One View Reporting enables end users to access data for simple to sophisticated reports using JD Edwards EnterpriseOne find browse applications with Oracle BI Publisher layout reporting and distribution features. One View Applications combine essential transaction data and master data, including associated descriptions and category codes, previously not available. Users have the ability to view data in the exact layout they desire using all the advanced capabilities of Oracle BI Publisher. One View Reporting provides a large library of pre-defined reports designed to answer the most common business questions. Delivered reports can be personalized by end users as needed and additional reports can be defined without IT support. The complexity of data models, table joins and business views are masked from the end user to ensure intuitive reporting experiences. One View Reporting provides users a simplified and clear view of the essential data necessary to effectively execute business processes.
